PROFILE

Developer with over 2 years of experience in building functional and efficient server-side applications. I am proficient in various programming languages, and I have actively contributed to all phases of the software development lifecycle. Passionate about crafting high-quality products aligned with customer requirements.

EDUCATION

- | | |
|---|---------------|
| - Bachelor of Computer Science | December 2024 |
| <i>Universidad Tecnologica Nacional, Argentina</i> | |
| - Associate's Degree in Software Development | December 2023 |
| <i>IESETyFP, Argentina</i> | |

SKILLS

- | | |
|--------------------------------------|-------------------------------|
| • Python (Django, Flask) | • Agile development (SCRUM) |
| • Java (Spring) | • Docker |
| • PHP (Laravel, Symfony) | • SQL (PostgreSQL, MySQL) |
| • Rest API (development and testing) | • Selenium, Gherkin, Cucumber |
| • Git, Github, Gitlab (CI/CD) | • Automation Testing |

WORK EXPERIENCE

Quality Assurance Automation Engineer	June 2022 – June 2023
<i>Jalasoft - Cochabamba, Bolivia</i>	

- Developed a comprehensive test automation script using Python and Selenium WebDriver, covering 100+ test cases, resulting in a 70% reduction in manual testing efforts.
- Designed and implemented a robust test automation framework for API testing, optimizing software delivery and ensuring high-quality products through automated testing procedures.
- Leveraged cloud services and database technologies to create scalable and efficient testing environments, enhancing testing capabilities and enabling seamless integration with continuous integration/continuous deployment (CI/CD) pipelines.
- Collaborated with developers and product managers to identify and resolve defects.
- Participated in Agile development processes and actively contributed to sprint planning and retrospectives.

Python Developer	July 2021 – June 2022
<i>Freelance</i>	

- Designed and developed scalable and efficient backend systems using Python, Django and Flask.
- Collaborated with cross-functional teams using Agile methodologies to gather requirements and ensure seamless integration of frontend and backend components.
- Proven track record of deploying applications to production, ensuring seamless and efficient releases.
- In-depth knowledge of cloud services, leveraging them to optimize application performance and scalability.
- Proficient in implementing Continuous Integration (CI) and Continuous Deployment (CD) pipelines for streamlined software delivery.
